A5768814 56.40LBS DOG TAN N PIT BULL

4/10/2026

INTAKE EXAM

NORMAL

56.40LBS

## Treatment Description:

Dog FAS Intake Medical/Behavior Form

S:

Patient was brought in as Owner surrender, OTC  
Microchip found with #:982091062289905

O:

Behavioral Observations

Offer tasty food: Readily ate

Type of food offered: Canned

Overall body posture: Upright, Relaxed/Flexible, Wiggly, Approaches readily

Ears: Neutral

Eyes: Soft eye gaze

Mouth: Lips long and soft, Open/Panting

Vocalizing: Quiet, Whining

Fear-Anxiety-Stress level observed at intake: (2) Moderate FAS

Other behavior observations: Friendly but evasive for exam. Anytime I would approach dog, he would orient himself so he would always face me head on. He dodged me anytime I attempted an oral exam. He fought to be muzzled and was wiggly during vaccines. He was overly food motivated, but did not show aggression (jumping on table to look for more food, tried to eat syringes, pulled tongue depressor out of my hand when I was giving him flea meds, ate entire paper plate in addition to food). According to TIP/owner, he is dog aggressive, specifically with male dogs. He did hyperfixate when he heard a dog barking and had a difficult time focusing or listening so long as he heard that dog.

Medical Observations:

WT 56.4lbs

Age: 6 years

Gender: male

BCS 2/9

MM- pink CRT- < 2 sec mentation: BAR

EENT: NSF

CV: NSF

RESP: NSF

Abdomen/UG: neutered/no presence of testicles.

PLN: NSF

Musculoskeletal: amb x 4

Integument: NSF

Grooming score: 2

Neuro: NSF

P: Routine vaccinations:

Nobivac DHLPP SQ RFL (booster in 2-4 weeks)

Bordetella Intratrach3 IN once (good for 1 year)
