Eval Comments: "The behaviors described today reflect the dog's responses in an Animal Care Center environment and during assessment. A dog's behavior in an Animal Care Center may differ significantly from how they behave in a home. Stress, confinement, and unfamiliar surroundings can cause dogs to act out or suppress behaviors that may emerge later. A dog's behavior may change based on surroundings, training, medical, socialization, and life experiences."

Davey A5773178 greeted the runner with a relaxed demeanor, he sniffed and licked the runner's hand, the runner attempted to leash him, he backed away to the edge of the kennel, his eyes were concerned, his tail was low, his mouth was slightly open with a soft pant, and he paced back and forth. The runner knelt and coaxed him for some time before he allowed her to leash him. He exited the kennel and strongly pulled on leash. In the catch pen when he was introduced to the dogs his body was neutral, his eyes were alert, his tail was low with no wag and his ears were alert. He was easy to collar and leash. He entered the yard and ignored the dogs. He roamed and sniffed his environmental surroundings. When Midus attempted to play with him, he grunted and slightly lip curled. Midus continued attempting to play with him, Davey growled and chased him away. He chased him a few times (Midus continued trying to play with him). He would slightly tense up with another one of the dogs in the yard and had to be moved away from him (using verbal and spray bottle). When a muzzled dog entered the yard, he was moved to the side yard to have some alone time. He growled, barked at the dogs, and ran chasing them through the side yard. Overall, Davey was selective of the dogs and does not have a playstyle at this time. See handling assessment.
