Eval Comments: “The behaviors described today reflect the dog’s responses in an Animal Care Center environment and during assessment. A dog's behavior in an Animal Care Center may differ significantly from how they behave in a home. Stress, confinement, and unfamiliar surroundings can cause dogs to act out or suppress behaviors that may emerge later. A dog's behavior may change based on surroundings, training, medical, socialization, and life experiences.”

Lovbug was on the outside of the kennel when the runner approached from the inside and opened the divider. She stood up, and slowly moved inside to greet the runner with neutral body, soft eyes, and a low tail. She was easy to leash and remove from the kennel, walked nicely on leash, and was easy to collar. In the catch pen, her body was neutral, her eyes were soft, and her tail wagged softly. She entered the yard, and exchanged appropriate greetings with the other dogs. She roamed the yard with a relaxed body, soft tail wag, and a mellow demeanor. She occasionally engaged in gentle play with other calm dogs, and would join the chase when the other dogs were racing through the yard. Lovbug is social with the other dogs, has a medium energy level, and prefers a gentle/dainty playstyle.
